

Qualities of Instructor which contributed to success of the course.	Qualities of Instructor which hindered success of the course.	Opinions of course, including printed materials.	Additional comments to improve overall quality of the course.	Any other comments.
Mona was very enthusiastic about the course which made me eager to show up to class and go over the weekly material. Her passion for chemistry was evident, and it is that passion which made the material easier to comprehend.	Given her circumstance, I felt that Mona delivered information well and communicated ideas exceedingly well. I was very impressed, to say the least, as well as humbled and inspired by her courage and fortitude.		Having the print-outs of the PowerPoint was very helpful and is something that should be repeated in the future if you decide to teach again.	Thank you, Mona, for a great semester!
The fact that the instructor was blind was ironically helpful because it required constant participation, not allowing for the class to drop in energy.	No.	N/A	N/A	This instructor was very helpful.
Mona is a really awesome TA. I thought it was interesting that she was blind. At first, I thought that this would compromise her teaching style. I WAS WRONG. I actually was very attentive in class, and she always motivated us to get on the chalk board and practice.	NONE	Excellent!	Good Job! Keep up the good work!	
She helped us engage and learn the topics	No	Very well done	None	None
Mona was always ready to help those who had trouble understanding certain concepts or problems. She is very knowledgeable on the subject matter and honestly I think she's a straight up genius! Her easy going personality made me feel comfortable to approach her.	Nope!	Chemistry is a difficult subject matter but Mona really helped us prepare for quizzes and exam questions.	Nope! Wish there was a curve but that is all	Thank you for all the dedication and willingness to help us. I think I can speak for all that you sincerely wanted us to do well. I wish you the best of luck with the rest of your graduate studies! I aspire to be as bad a** as you one day ;)
Mona was always enthusiastic about the material and more than willing to explain a concept until it was completely understood. She engaged the entire class every week and the way she worked through problems with the class made you feel personally responsible for understanding every step, and more than welcome to ask for clarification about either specifics of the question or broader concepts. I always feel like I understand the material much more after leaving discussion.				I would, without hesitation, say that Mona has been the best TA I have had here at UF, and were she a professor I would go out of my way to take another class with her, if one were available.
Although she was blind she was extremely helpful and always explained things until everyone understood what was going on		Her powerpoints were well organized and easy to understand, it was also very helpful that she handed them out so we could better follow her directions		
Very thorough in her explanations, actually made us work problems out on the board to make sure we got practice, engaged the class collectively to help each other work out problems.	Not sure how long she has been a TA but she could get flustered at times, seem a little nervous but nothing that was extremely detrimental to the course.			One of the better TAs that I have had at UF.
Very happy and energetic for class	Even being blind, Mona did a great job	its difficult	I like when you print practice problems
